

Day 39

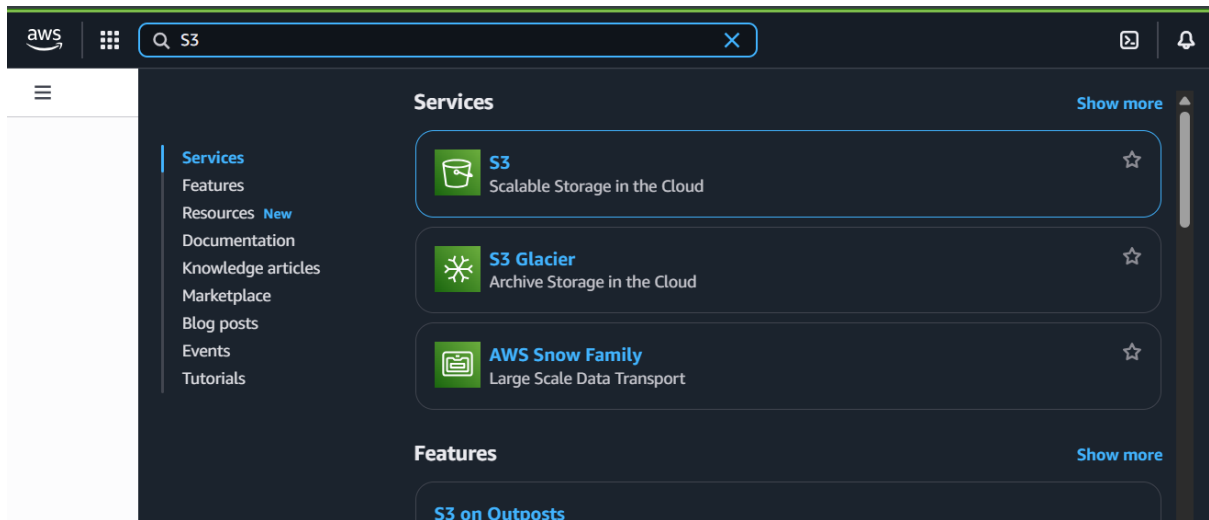

“CLOUD SECURITY”

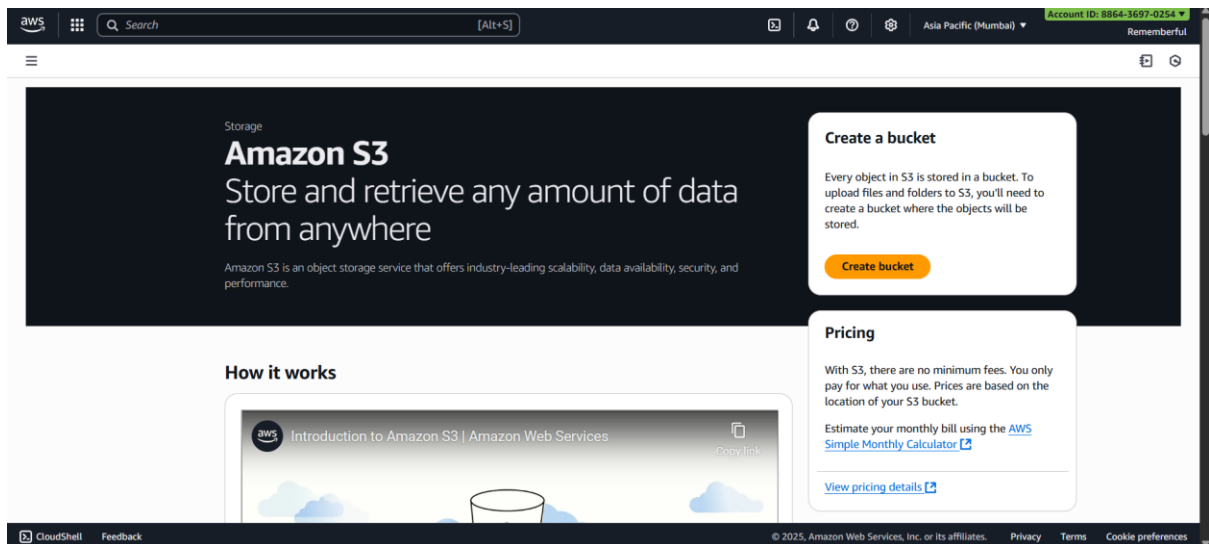

Restricting Non-SSL Access for S3 Objects using Bucket policies:

Steps:

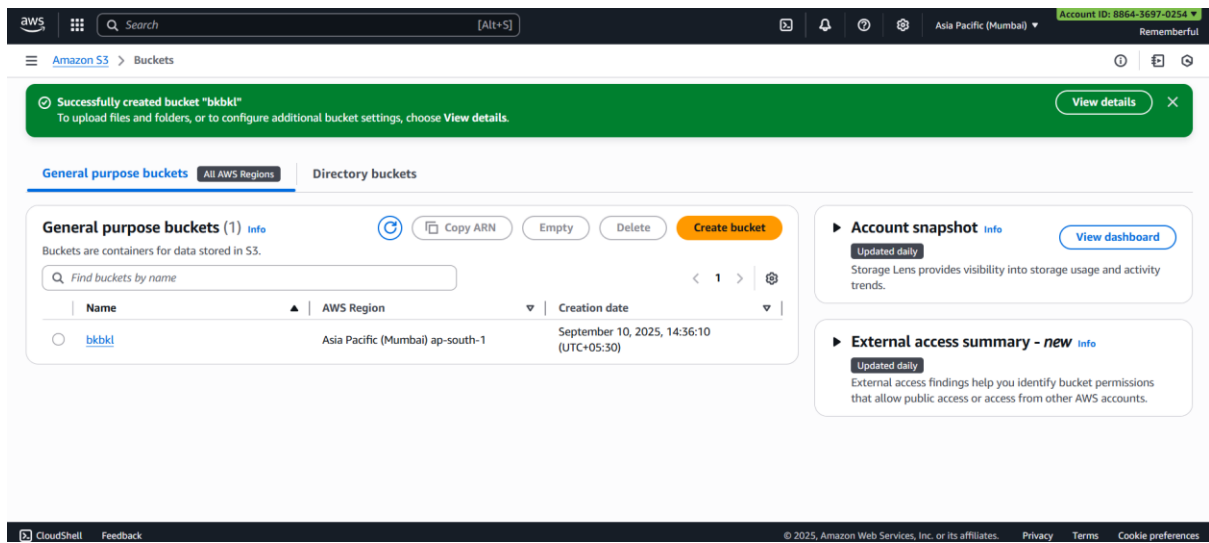

Look for S3:

Following screen will appear:

Create one bucket publicly available:

Successfully created bucket "bkbkl"
To upload files and folders, or to configure additional bucket settings, choose [View details](#).

General purpose buckets (1) [Info](#)

Buckets are containers for data stored in S3.

Find buckets by name

Name	AWS Region	Creation date
bkbkl	Asia Pacific (Mumbai) ap-south-1	September 10, 2025, 14:36:10 (UTC+05:30)

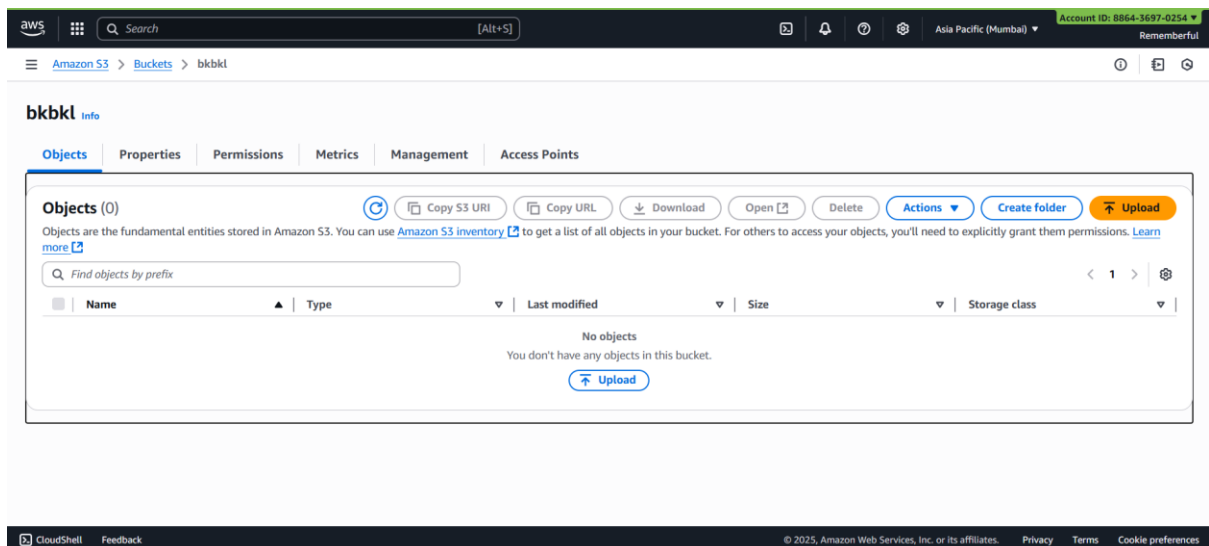

Account snapshot [Info](#) [View dashboard](#)

Updated daily
Storage Lens provides visibility into storage usage and activity trends.

External access summary - new [Info](#)

Updated daily
External access findings help you identify bucket permissions that allow public access or access from other AWS accounts.

Open that bucket:

bkbkl [Info](#)

Objects [Properties](#) [Permissions](#) [Metrics](#) [Management](#) [Access Points](#)

Objects (0) [Copy S3 URI](#) [Copy URL](#) [Download](#) [Open](#) [Delete](#) [Actions](#) [Create folder](#) [Upload](#)

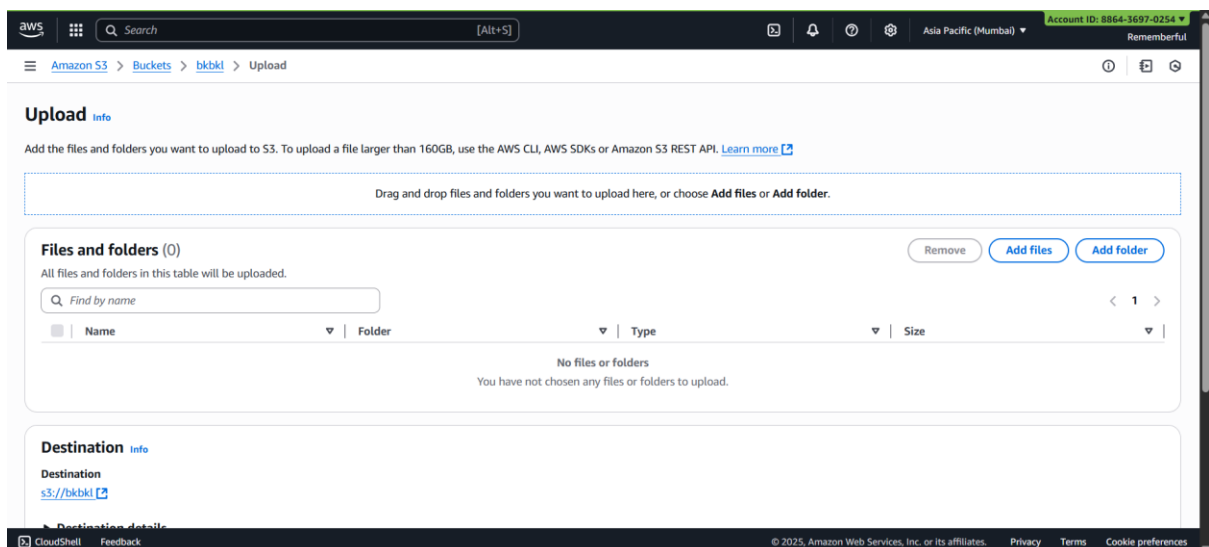

Objects are the fundamental entities stored in Amazon S3. You can use [Amazon S3 inventory](#) to get a list of all objects in your bucket. For others to access your objects, you'll need to explicitly grant them permissions. [Learn more](#)

Find objects by prefix

Name	Type	Last modified	Size	Storage class
No objects You don't have any objects in this bucket.				

[Upload](#)

Click on "upload" button:

Upload [Info](#)

Add the files and folders you want to upload to S3. To upload a file larger than 160GB, use the AWS CLI, AWS SDKs or Amazon S3 REST API. [Learn more](#)

Drag and drop files and folders you want to upload here, or choose [Add files](#) or [Add folder](#).

Files and folders (0) [Remove](#) [Add files](#) [Add folder](#)

All files and folders in this table will be uploaded.

Find by name

Name	Folder	Type	Size
No files or folders You have not chosen any files or folders to upload.			

Destination [Info](#)

Destination
[s3://bkbkl](#)

[Destination details](#)

Add the .html file:

Upload [Info](#)

Add the files and folders you want to upload to S3. To upload a file larger than 160GB, use the AWS CLI, AWS SDKs or Amazon S3 REST API. [Learn more](#)

Drag and drop files and folders you want to upload here, or choose **Add files** or **Add folder**.

Files and folders (1 total, 926.0 B)

All files and folders in this table will be uploaded.

☐	Name	Folder	Type	Size
☐	index.html	-	text/html	926.0 B

Destination [Info](#)

Destination: [s3://bkbkl](#)

► **Destination details**
Bucket settings that impact new objects stored in the specified destination.

See the success notification:

Upload succeeded
For more information, see the **Files and folders** table.

Upload: status [Close](#)

After you navigate away from this page, the following information is no longer available.

Summary

Destination	Succeeded	Failed
s3://bkbkl	1 file, 926.0 B (100.00%)	0 files, 0 B (0%)

Files and folders (1 total, 926.0 B)

Name	Folder	Type	Size	Status	Error
index.html	-	text/html	926.0 B	Succeeded	-

Select the object, and click on “Make public using ACL” from “actions”:

bkbkl [Info](#)

[Objects](#) [Properties](#) [Permissions](#) [Metrics](#) [Management](#) [Access Points](#)

Objects (1/1)

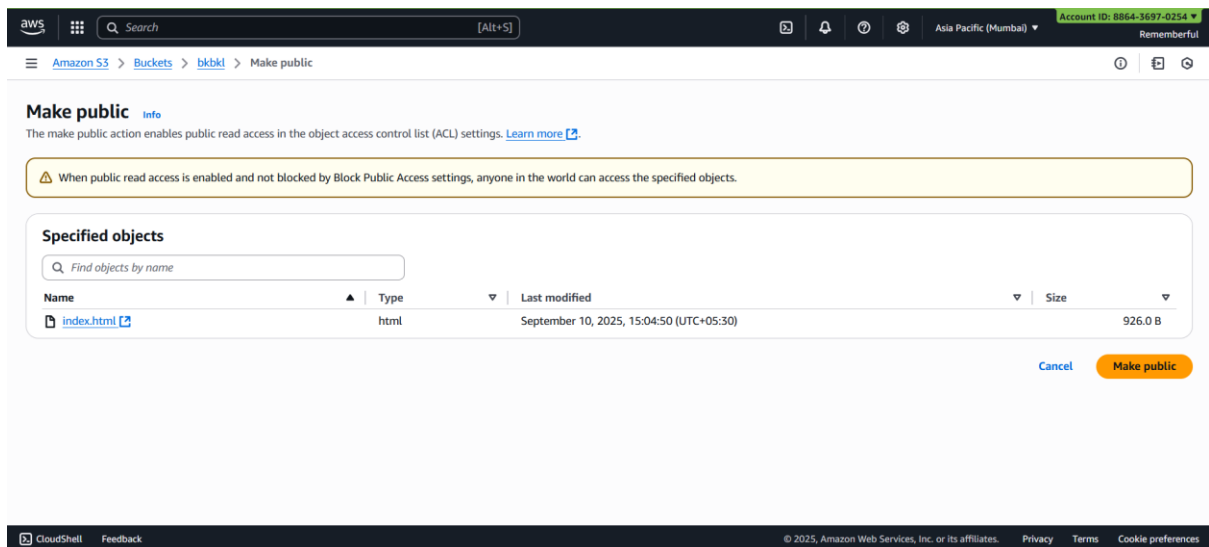

Objects are the fundamental entities stored in Amazon S3. You can use [Amazon S3 inventory](#) to get a list of all objects in your bucket. For others to access your objects, [more](#)

☒	Name	Type	Last modified	Size
☒	index.html	html	September 10, 2025, 15:04:50 (UTC+05:30)	

Actions [Create folder](#) [Upload](#)

- Share with a presigned URL
- Calculate total size
- Copy
- Move
- Initiate restore
- Query with S3 Select
- Edit actions
 - Rename object
 - Edit storage class
 - Edit server-side encryption
 - Edit metadata
 - Edit tags
 - Make public using ACL

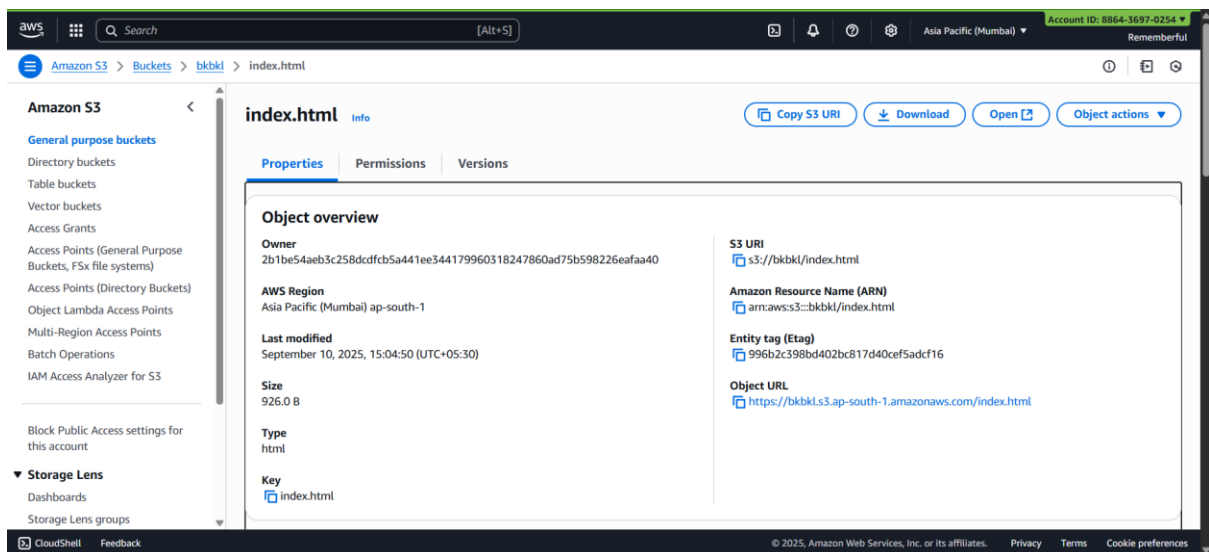

Following screen will appear:

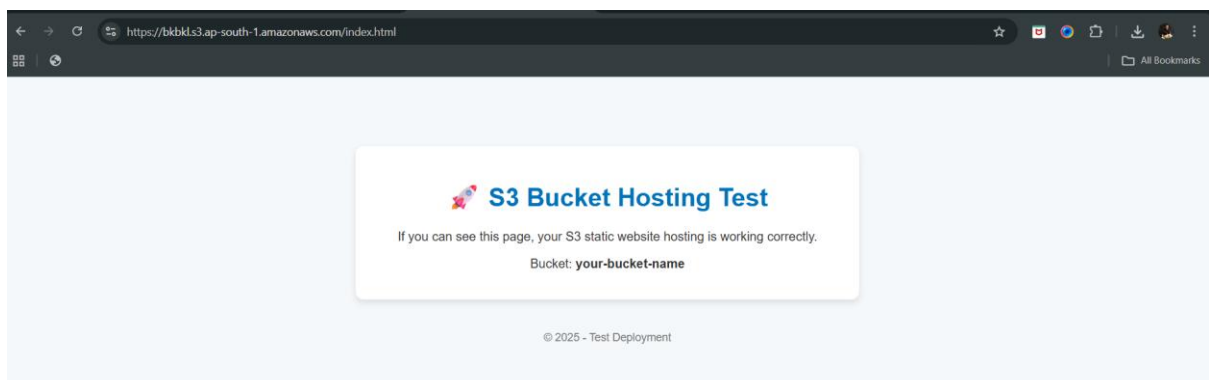

Click on “Make public” button: following confirmation will occur.

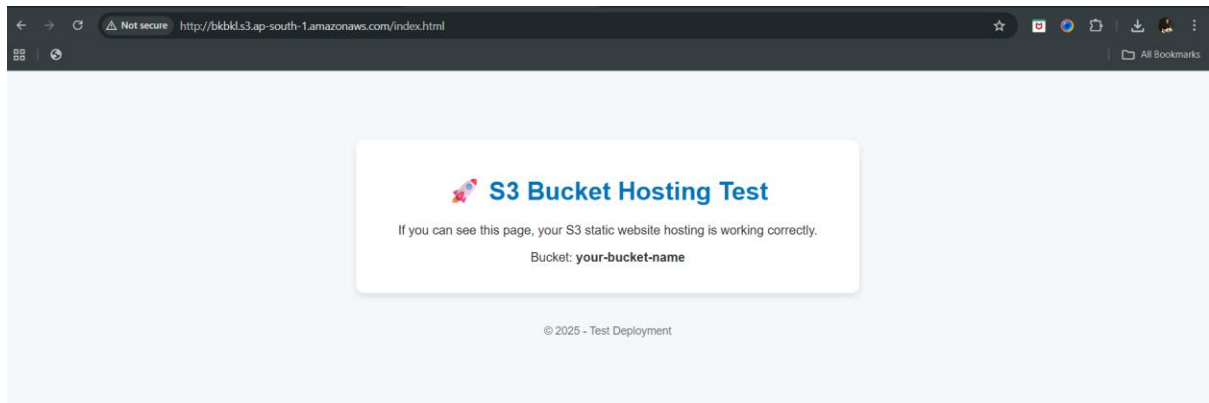

Click on the object, copy the object URL:

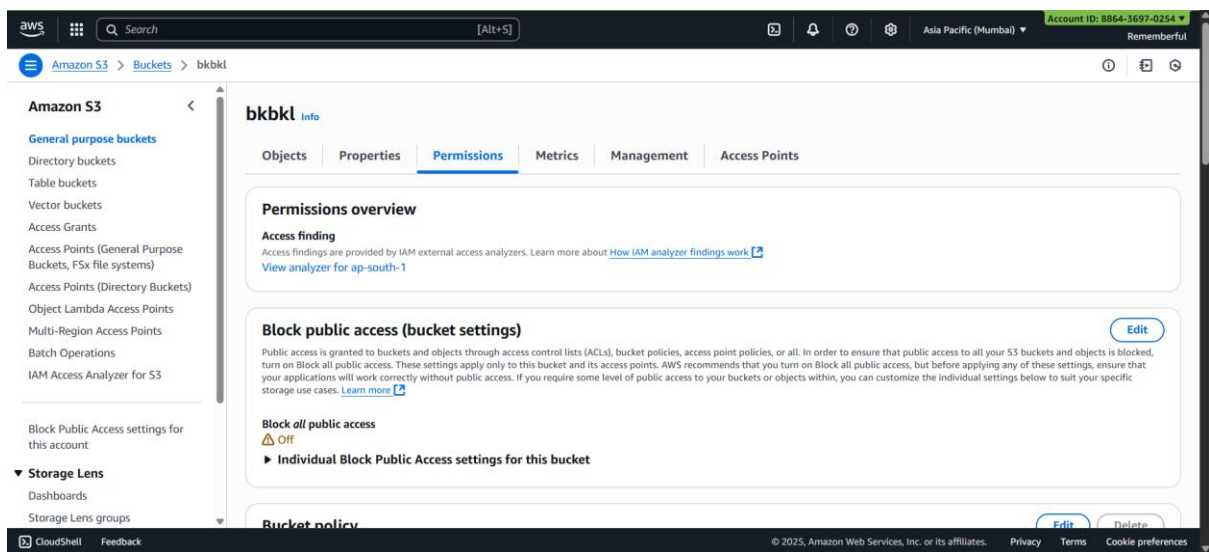

Paste the URL:

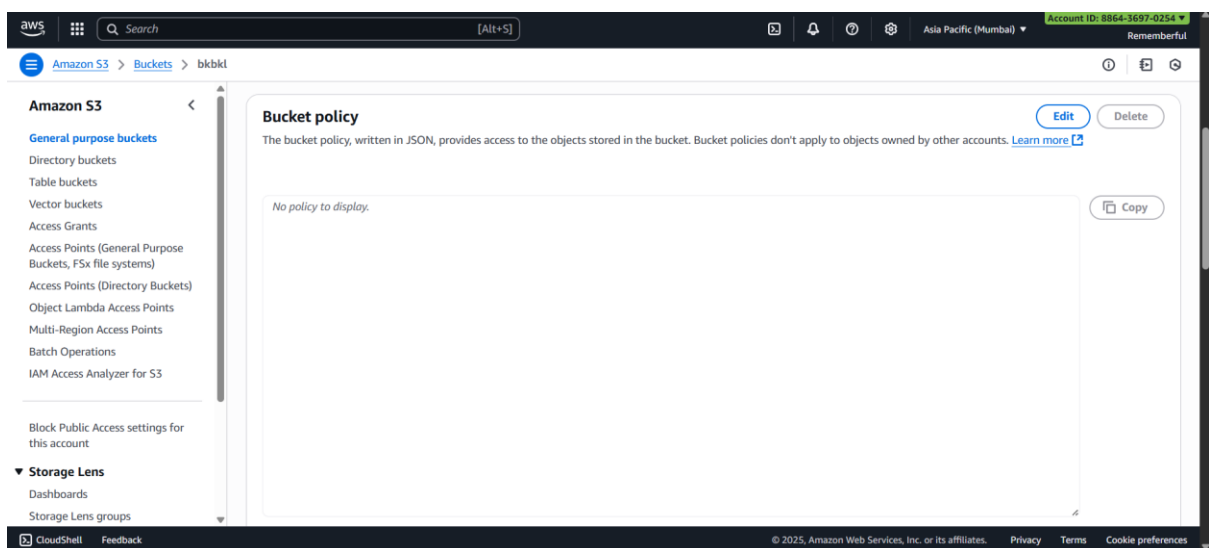

Make changes in the URL from https to http: clearly it says not secure.

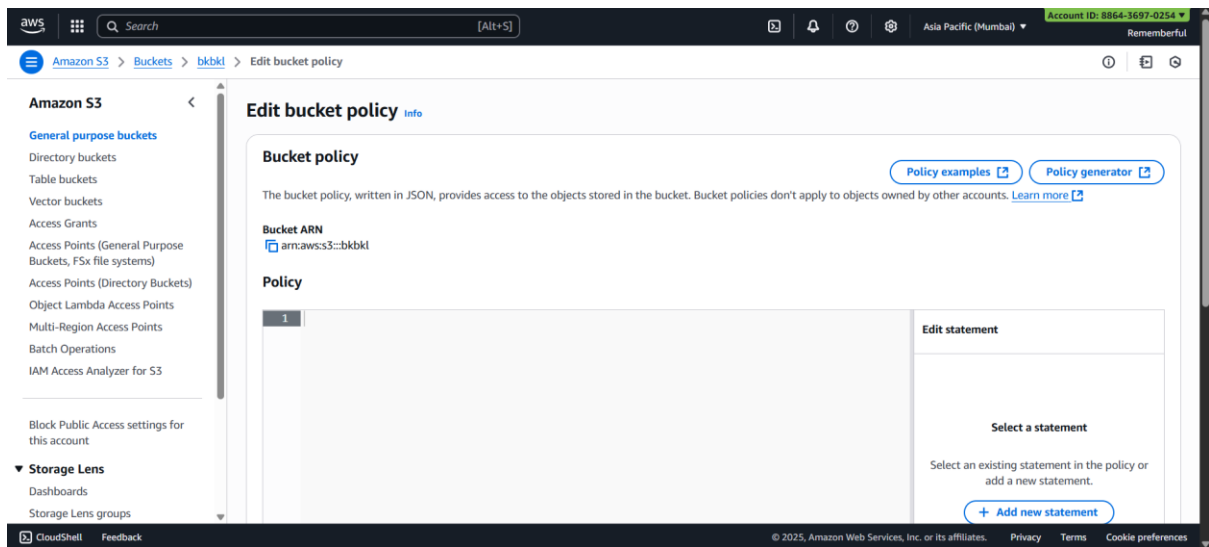

Now, we will set the secure connection for the object inside the bucket:

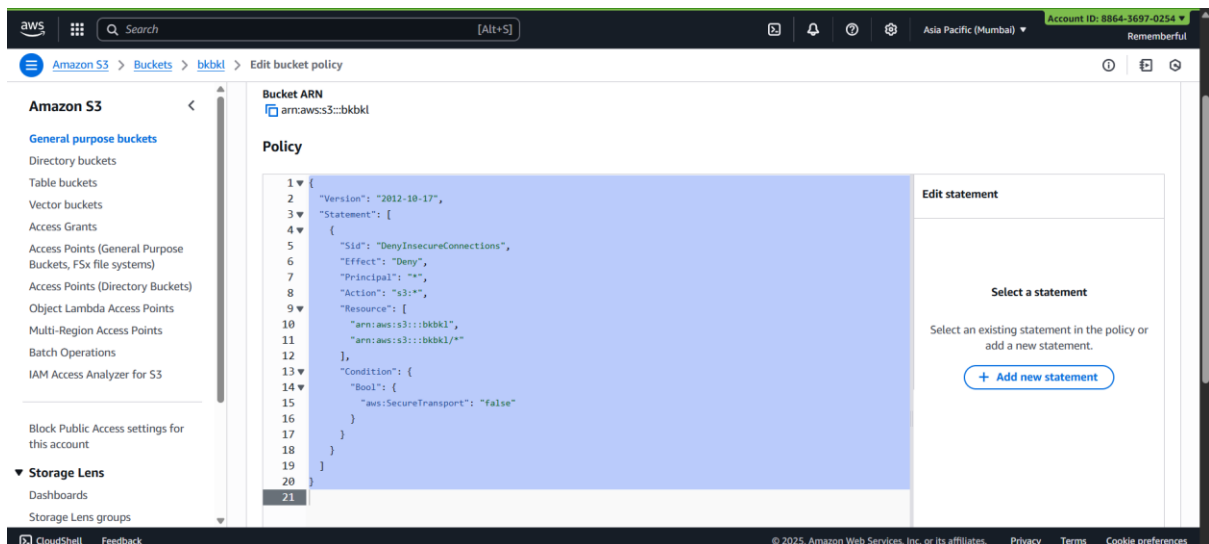

Now, click on “Edit” button:

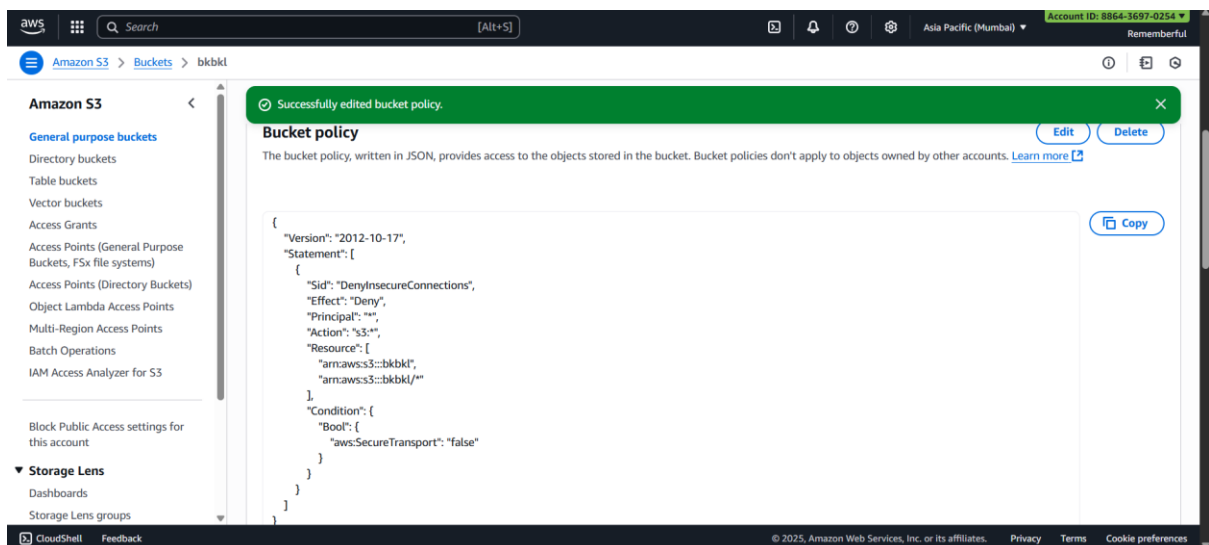

Following screen will appear:

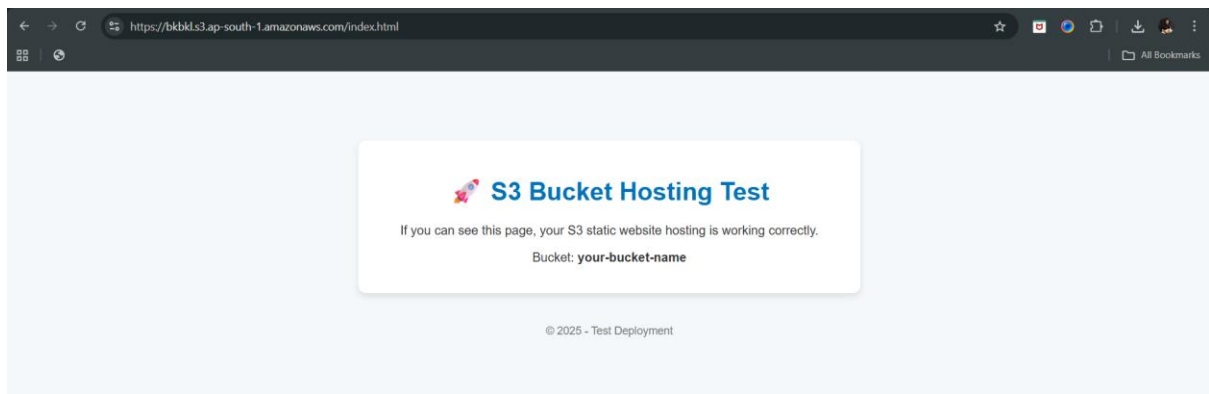

Copy paste the following policy:

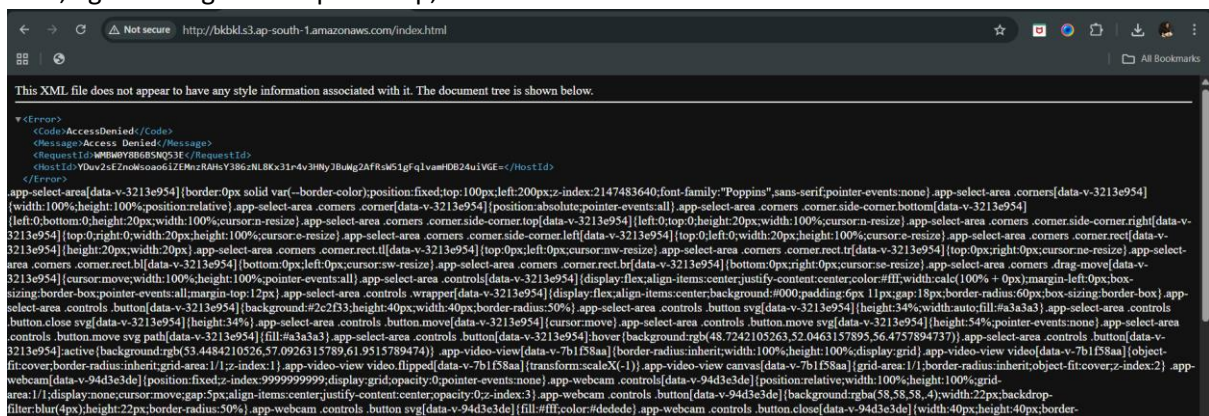

Click on "Save changes" button, following confirmation will occur:

Check if it is still accessible or not:

Now, again change the https to http, this time content is not visible:

Done!

--The End--
